Dry Crack Chasing Blades

Wel-Co Crack Chasing Blades are designed for opening cracks in concrete or asphalt surfaces. The clean open cracks are then filled with sealant material. The blades are used on crack chasing saws which allow the blade to follow random cracks.

Application Specs	
PDC-2PV	Designed to open cracks in cured concrete on a right angle grinder (4" only)
DCC-1P	Designed to open cracks in cured concrete
DCC-1PV	Designed to open cracks in cured concrete. V-Design to bevel crack
